PASSIVE PROTECTION & INSULATION MARKET

"The Ipsiis foam manufacturing process allows the production of technical composite materials. Its fire classification and environmental balance are real assets for the proposal".

Mohamed L. - Agency Director

Due to their very low energy and carbon content (1/5th of standard solutions), IPSIIS foam products contribute to the respect of the new RE2020 regulation.

EVENT

IPSIIS ON THE FRONT PAGE

CTB magazine highlights IPSIIS and its non-combustible and insulating mineral foam: a new material with social & environmental benefits.

BUSINESS

CARBON PRICE EVOLUTION

The price of European carbon allowances (EU ETS) has risen by more than 200% since the beginning of 2021, boosted by the adoption by the European Commission of CO2 emission reduction targets.

Due to its very low carbon content, IPSIIS foam is a major asset to challenge European Green Deal Climate Action objectives
